DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a micro-mechanical hinge, classified in class 16, subclass 221.
 - II. Claims 13-23, drawn to a V antenna, classified in class 343, subclass 735.
 - III. Claims 24-40, drawn to a docking switch, classified in class 335, subclass 6.
 - IV. Claims 41-47, drawn to a reconfigurable capacitor, classified in class 361, subclass 277.
 - V. Claims 48-62, drawn to a reconfigurable microstrip line, classified in class 333, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are each unrelated to each of the other inventions. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different effects. The hinge, antenna, switch, capacitor and transmission line as recited are not capable of use together as a single device because the components from which they are formed are not compatible so as to result in a working device. Also, each of the inventions has a different effect such as

allowing rotation, radiating energy, switching between conductors, storing energy and forming a path for the propagation of energy; respectively.
